

Virtual desktops for architects, designed by AEC experts

Enjoy the best of all worlds

Choose cloud workstations, managed VDI or a hybrid solution

VCDPOD

Next-level performance for your most immersive designs

Dedicated, single-tenant power

Higher clock speeds for the most demanding apps to meet the rising needs of architects, designers and visualisation teams.

Cost-effective and powerful

Effortlessly handles the most complex, immersive designs, with no hidden charges or need to upgrade CAD workstations or VDI profiles.

Your workstation, powered by the cloud

All the performance of a high end in-office workstation with flexibility for hybrid working and the agility of cloud resources.

Full control

Simplified IT management, with local secure storage, giving you full data control to meet compliance, sovereignty and protection requirements with ease.

VDIPOD

Secure, sustainable and cost-effective collaborative workspaces

No1 virtual desktop solution in AEC

Purpose-built to meet industry demands for mobility, productivity and sustainability.

Industry leading UX

The perfect fit for the majority of AEC workloads, delivering exceptional VDI user experience for CAD and BIM projects.

Headache-free management

Removing the VDI management burden from in-house teams, the fully managed and optimised solution lowers IT operational costs and datacentre footprints.

Unmatched sustainability

Hosted in datacentres operating on 100% renewable energy, delivering reduced power consumption and environmental impact.

Purpose-built for AEC

Virtual desktops designed, delivered and optimised by industry experts, with easy access to 24/7/365 support delivered by our 1st, 2nd and 3rd line AEC tech specialists.

Empower your team with the right resources for every challenge

Purpose-built, complementary virtual desktop solutions designed to give architecture practices the ultimate performance, productivity and scalability to grow.
