

VCDPod Cloud Workstations

Virtual cloud desktops purpose built for architects who demand performance.

Creative ITC

Empowering architects with ultra high-performance, secure cloud desktops

Introducing VCDPod Cloud Workstations, designed to meet the demanding performance and flexibility needs of architecture firms.

Resource-intensive design and visualisation applications, simulations, 3D rendering and modelling all strain existing IT infrastructures and can become cost-prohibitive with VDI platforms.

VCDPod is the next-gen solution purpose-built to overcome these challenges.

Key features & benefits of VCDPod

Effortless power for peak performance

Dedicated, single tenant access to high-end computing resources, delivering higher clock speeds for the most demanding workloads.

Your workstation, your way

The full power of a high-end in-office workstation with multi-screen capabilities and no image degradation wherever your team works.

Cloud-powered flexibility

Boost project delivery by scaling resources as demands grow - no workstation or VDI profile upgrades required.

Cost effective, no catches

Transparent pricing, real-time usage tracking and better ROI.

Full control of your data

Secure local storage to meet compliance, data sovereignty and protection requirements with ease.

Simplified IT management

Opt for fully managed with easy access to 24/7/365 AEC expert tech support.

Purpose-built for AEC

Designed, delivered and optimised by AEC industry experts for AEC industry experts. No vendor lock-ins, just results.

Answering AEC industry needs

Our new high performance VCDPod cloud desktops complement our existing fully managed VDI solution, giving architecture practices the ultimate flexibility to create a tailored, hybrid solution designed to scale with them.

VCDPOD

Next-level performance for your most immersive designs

- Dedicated, single-tenant power
- Higher clock speeds for demanding apps
- Multi-screen capabilities with no image degradation
- Cloud-powered agility
- Cost-effective high performance

VDIPOD

Secure, sustainable and cost-effective collaborative workspaces

- No1 VDI solution for AEC
- Purpose-built for mobility and productivity
- Exceptional VDI UX
- Unmatched sustainability, reducing power consumption and emissions
- Headache free management

Empower your architecture team with the right resources for every challenge – all within a flexible, scalable and secure cloud environment.

Use cases

VCDPOD

- Flawless reproduction of intricate graphics, wire frames and textures
- 3D modelling
- Photo-realistic rendering
- Visualisations
- Simulated fly-throughs

VDIPOD

- Office productivity suites
- BIM collaboration
- CAD applications
- Remote working where sustainable, efficient resource use is required

Want to see VCDPod in action? **Let's talk.**

Why choose Creative ITC?

Want to talk to IT experts who really understand the AEC industry? We've been designing and delivering game-changing technology solutions in the industry for 20 years.

Businesses recognise the benefits of our unique insight – we work with 8 of the UK's top 10 architects (AJ100 2025), three of the largest global engineering companies, and some of the world's leading construction firms.
